I am planning to develop a website and would like to invite a proposal for the same.

From my side, I will provide the following:

1.Hosting and domain access

2.Complete website content

3.The exact design and layout that I want to be implemented

Scope of work required from your end:

1.Develop the website by writing custom code or by using suitable templates based on the design provided.

2.Deploy and host the completed website on my hosting server.

3.Recommend the appropriate technology stack or programming language for building the website(Frontend, Backend and Database).

4.Provide the estimated timeline required to complete the project.

5.Submit a detailed quotation for the complete website development, including deployment and provisions for future updates or maintenance.

Kindly share your proposal covering the above points.

Please note that similar requirements for both static and dynamic websites will be shared on an ongoing basis. I am looking to establish a long-term working relationship for continuous website projects.

Website Requirement Specification
Project: Tamil Daily Calendar Website

1. Project Overview

1.1 Purpose

The purpose of this document is to define the functional and non-functional requirements for developing a **Tamil Calendar Website**.

1.2 Objective
